

Apple OS 10.5 onwards

1. From the Airport Icon select the Connect to UCOL Network – This will give you access to the UCOL Intranet

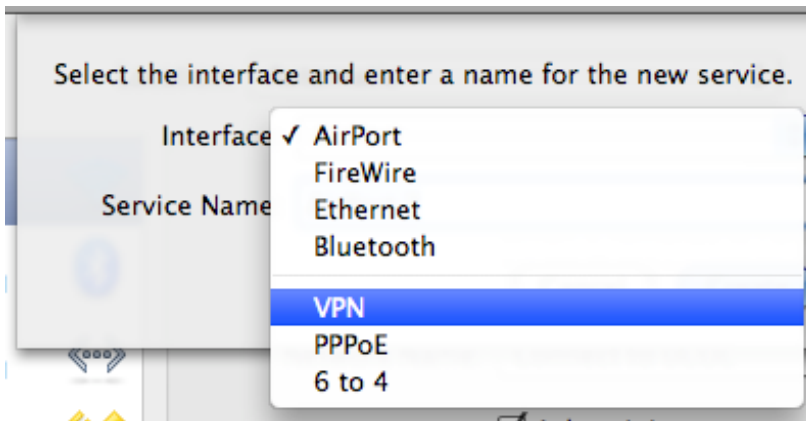

2. Press the Airport Icon again and select Open Network Preferences

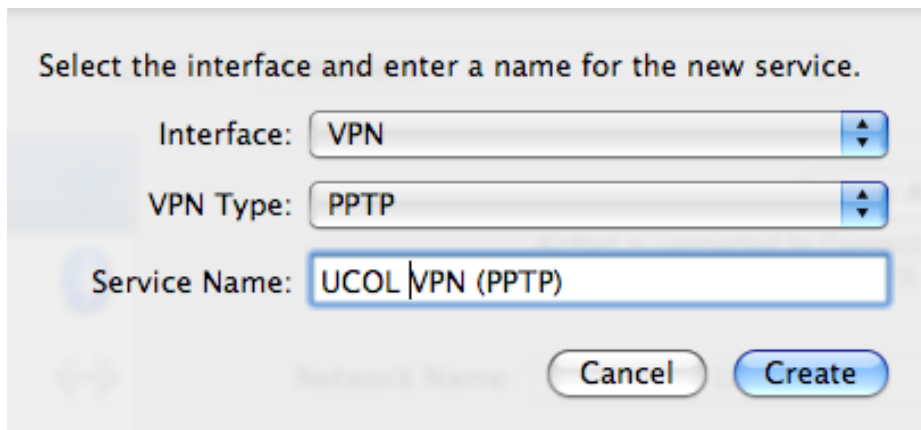

3. Press the Plus (+) option to add a new network.

4. From the list that appears select VPN

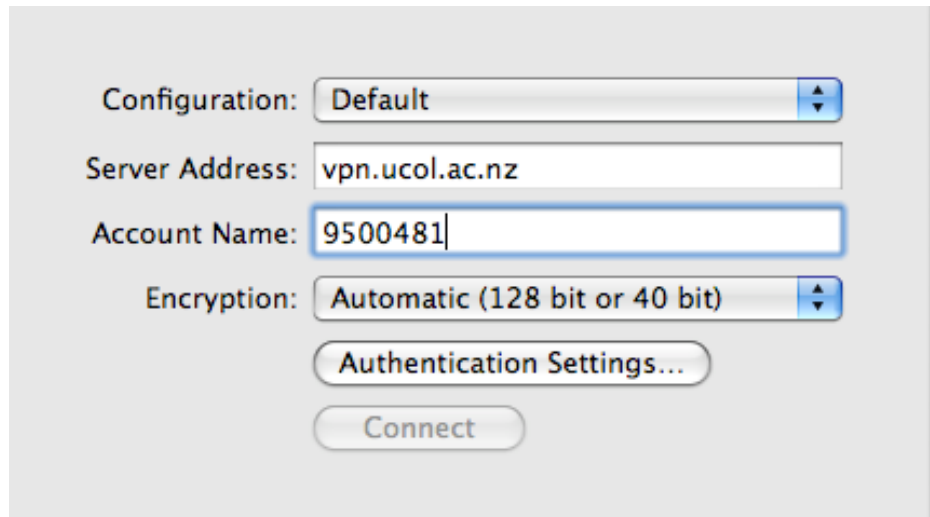

5. From the VPN Type select PPTP. Enter in a name for the new network (e.g. UCOL VPN)

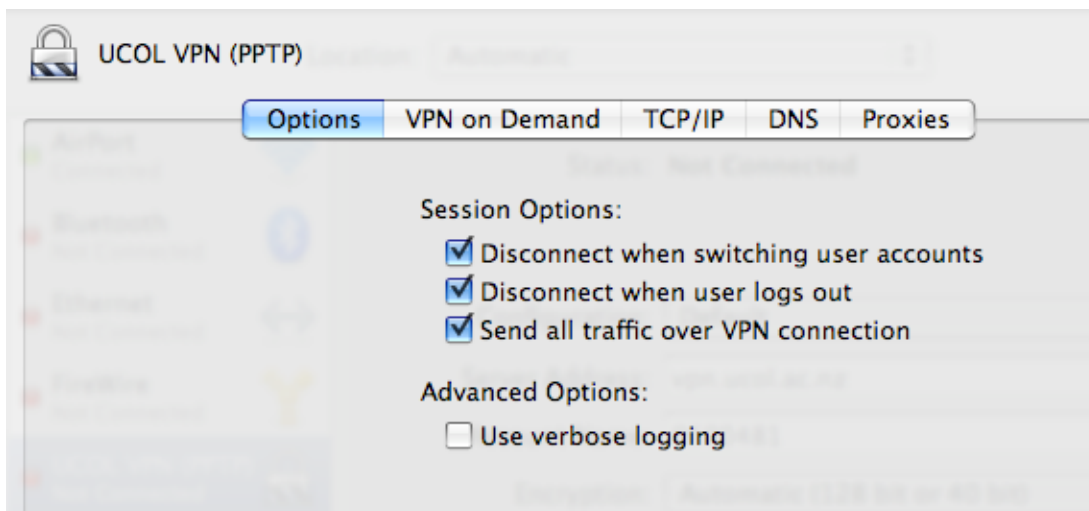

6. Press Create

7. Enter in the following information:
 - a. Server Address – vpn.ucol.ac.nz
 - b. Account Name – Your Student ID Number
 - c. Encryption - Automatic

8. Press the Apply Button
9. Press the Advanced Button

10. Make sure the **Send all Traffic over VPN connection** is ticked.
11. Press Ok
12. Press Apply
13. Press the Connect button – a logon box should appear asking for your UCOL password.

Status: Connected
Connect Time: 00:00:19 Sent: □□□□□□□□
IP Address: 10.99.8.138 Received: □□□□□□□□

14. The Status should change to **Connected** if the correct ID number and password has been entered.
